

IN THE TITLE:

Please replace the present title with the following:

--NON-ENDOCRINE DISRUPTING CYTOPROTECTIVE UV RADIATION  
RESISTANT SUBSTANCE--.

IN THE SPECIFICATION:

During the interview of July 17, 2002, examiner reminded applicant that applicant must;

- 1). Show support for the claims in the specification and point out where the support in the specification exists and;
  
- 2). Describe the present invention as a non-endocrine disrupting sun-block which is a novel and unobvious embodiment of the present invention.

Applicant has been diligent in his efforts to distinctly show support in the original specification and applicant wishes to correct the specification with regard to the words "sunscreen" and "sun-block". Examiner is reminded that on page 14, paragraph [0059], line 3 of the original specification, the use of butyl-methoxydibenzoylmethane has been singled out as an organic sunscreen that has been found to be a non-endocrine disruptive agent. Therefore, the present invention finds

support in the specification, not only for non-endocrine disruptive sun-block, but also for non-endocrine disruptive sunscreen substances.

Applicant therefore respectively requests the following changes to the specification for the purpose of consistency and clarity.

Applicant further submits that these changes represent no new matter. All changes to the specification below find support on page 1, paragraph [0001], line 2, and again on page 12, paragraph [0050], lines 1-4 of the original application.
